

I live in Washington State. I am opposed to media consolidation because most folks get their news from the local channels. I have recently heard about Sinclair Broadcasting which is forcing the locals to air an anti-Kerry documentary. This company uses the airways for free yet chooses to impose information on the viewers of those channels that provide so much wealth for them. This like a third world country - we have decided that we can restrict the press and make the people pay for it. Please make sure that a pro-Kerry ad is shown right after the anti-Kerry ad or you will be complicit in making the USA more like the Communist countries that so many in America decry.

Make sure that media consolidation is limited in order to keep our country free.

Thank you
